Andrew

"I have designed website layouts and print materials for client projects and created many unique designs for STG for both print and digital uses. This combination of tasks... has made for an exciting and truly valuable experience.

"I have been a part of group projects such as creating marketing materials for products or services we offer as well as taken on projects on my own... [which] has made me realize my strengths and weaknesses.

Sean

Shumaker Technology Group

## Graphic Designer Job Responsibilities

- You must possess proficiency in Adobe Photoshop and at least a familiarity with Adobe Illustrator and InDesign. Proficiency in Illustrator and InDesign is preferred.
- You will be responsible for creating fully custom mockups for client website projects. As each project is different, you must be flexible to adapt to the demands of each specific project. Other associated tasks may include cropping, editing, and resizing photos and creating vector icons and buttons.
- You will be responsible for creating marketing materials for the Shumaker Technology Group and our clients, including flyers, brochures, postcards, and other materials for mailings, trade shows, and other marketing purposes.

Visit [www.shumakergroup.com/careers.php](http://www.shumakergroup.com/careers.php) or scan this code to learn more and apply for this opportunity.

- All internal designs will adhere stylistically to the company branding guidelines.
- You will be responsible for creating logos, business cards and other branded business essentials, print and digital marketing materials, and various other designs for client graphic design projects.
- Familiarity with photo and video shooting and editing is preferred.
- A willingness and adaptability to take on tasks outside of these is essential to being successful in this position.
