Garrett

"The projects I have been a part of allowed me to get real-world web development experience that I would not have been able to get otherwise in a regular part time job."

"The best thing about working at the Shumaker Group wasn't what I was able to contribute with my current skillset, it was what I was able to learn and take away from being under the supervision of the Shumaker Group."

Stu

Shumaker Technology Group

## Web Developer Job Responsibilities

- You will be responsible for developing custom websites for our clients as well as helping to maintain, enhance, and upgrade websites for our existing clients.
- A majority of the websites that you develop will require some sort of database driven back end and will require some amount of custom programming.
- You will be required to perform basic graphic design and user interface creation tasks in support of the websites that you develop. These may include, for example, cropping, editing, and resizing photos and creating vector icons and buttons.
- You will be responsible for meeting with clients and potential clients to determine the goals and details of their project and expressing Shumaker Group's capabilities and services and the best next steps for moving forward with the project.

Visit [www.shumakergroup.com/careers.php](http://www.shumakergroup.com/careers.php) or scan this code to learn more and apply for this opportunity.

## Technologies You Will Work With:

- HTML and CSS are the primary languages of the Internet and will be critical to your success as a Web Developer.
- Our primary development environment consists of LAMP (Linux, Apache, MySQL, PHP) Servers running WHM/Cpanel.
- You are likely to work with many other technologies including but not limited to HTML5, JavaScript, jQuery, AJAX, XML, and JSON. The exact set of technologies you will utilize will depend on your skillset and our current projects.
